

## Preliminary programme

---

Seminar/roundtable discussion on approaches to tackle climate and development challenges simultaneously, with a particular focus on Global Feed-in Tariffs  
Monday 16 May, 2011, 13.00-16.00, Skeppsholmen, Stockholm

12.30           **Coffee/tea**

13.00           **Meeting starts**

Introduction and setting the context  
*Niclas Hällström*

The need to tackle climate change, development and energy poverty simultaneously: The case for a Global Marshall Plan and global feed-in tariffs for affordable, renewable energy in developing countries.  
*Tariq Banuri*

The experience from India: Feed-in tariffs as a means to tackle poverty and transition to renewable energy  
*Sunita Narain*

Common discussion on:

- How would the system work?
- Are there alternatives? How do global feed-in tariffs stand against other policy tools such as carbon taxes, carbon trading etc.?
- How much would it cost?
- What are potential drawbacks? What are the necessary safeguards and how can they be ensured?
- What are the benefits for developing countries? What are the benefits for developed countries?
- What are the political opportunities (including Rio +20)?
- How can countries take a lead? What are short-term political gains?

16.00           **Meeting ends**
